

HealthLynked Corp. Announces Release of New Network Service Allowing Creation and Management of Profiles for Children

April 10, 2018

Naples, FL- (April 10, 2018) – HealthLynked Corp. (OTCQB: HLYK) today announced release of its latest software updates to the HealthLynked Network. The new features allow parents to create profiles for their children under the age of 18. Parents can now completely manage the personal health records of their children to assure their records are up to date and accurate by utilizing the HealthLynked Network services. Parents can “lynk” to their children’s healthcare providers to manage their appointments and share medical information with the healthcare providers they choose.

Once children reach the age of 18 they need to claim ownership of their profile in order to continue to be active in the HealthLynked Network. Both parents can share access to their children’s profiles allowing full interoperability and co-management for medical care and emergency situations that may arise.

HealthLynked CEO Dr. Michael Dent stated, “We recognize that management of our children’s health is of utmost importance and our latest software release addresses this need. Children rely on their parents to manage their healthcare and as children get older this need changes. A child’s personal health record managed by the parents can provide better healthcare and provide access to life-saving information when a child is at school or traveling away from home.”

About HealthLynked Corp.

HealthLynked Corp. provides a solution for both patient members and healthcare providers to improve healthcare through the efficient exchange of medical information. The HealthLynked Network is a cloud-based platform that allows members to connect with their healthcare providers and take control of their medical information. Members enter their medical information, including medications, allergies, past surgeries and personal health records, in one convenient online secure location, free of charge.

Participating healthcare providers can connect with their current and future patients. The benefits to our providers include the ability to utilize the HealthLynked marketing tools to connect with their active and inactive patients to improve patient retention, access more accurate and current patient information, provide more efficient online scheduling, and to fill last minute cancellations using our “real time appointment scheduling” mobile

application. Healthcare providers pay a monthly fee to access these HealthLynked services.
